- github.com/fahisapallikkattil
- Dubai, UAE

Technical Skills

- Frontend Development :**
- HTML5, CSS3, JavaScript (ES6+)
 - React.js (Functional Components, Hooks, Props, State, Router)
 - Tailwind CSS, Bootstrap
- Backend & APIs :**
- Node.js & Express.js
 - REST API Integration, JSON, Fetch
 - CRUD Operations, Database Connectivity
- Databases :**
- Mongo DB
 - MySQL
 - Firebase / Firestore

- AI Tools & Platforms:**
- AI Models - ChatGPT, Gemini, Claude
 - Automation - Zapier, Make, n8n
 - Retrieval-Augmented Generation (RAG) Systems
 - Prompt Engineering & LLM Optimization
 - AI Media & Content Creation - Midjourney, RunwayML, HeyGen, Gamma
 - AI Development & Coding Tools - Cursor, Windsurf
 - AI Builders - Firebase Studio, Lovable

- Version Control & Tools :**
- Git, GitHub, GitHub Actions (CI/CD basics)
 - VS Code
 - NPM Package Management
 - Vite (Frontend Bundler / Build Tool)

- Deployment & Hosting :**
- GitHub Page
 - Continuous Integration / Deployment (CI/CD basics)

- Automation & Data Visualization :**
- Python
 - Openpyxl
 - MS Excel
 - Power BI

FAHISA PALLIKKATTIL

Frontend Developer with AI & Automation Expertise

AI-Powered Frontend Developer with strong experience in building scalable and high-performance web applications using React.js, JavaScript (ES6+), and modern UI frameworks. Certified in Applied AI (IITM Pravartak), with hands-on expertise in AI agents, workflow automation, prompt engineering, and Retrieval-Augmented Generation (RAG) systems. Skilled in integrating AI capabilities with web technologies to build intelligent, user-centric solutions. Passionate about leveraging AI and automation to enhance digital experiences and business efficiency.

Experience

Freelance Web Developer | Dubai, UAE

Jun 2023 – Present

- Developed scalable React.js applications with responsive UI and reusable components
- Integrated REST APIs and optimized performance using modern state management tools
- Designed and implemented AI-powered solutions including chatbots, automation systems, and intelligent workflows
- Built Retrieval-Augmented Generation (RAG) based chatbot systems for contextual information retrieval
- Developed AI agents for real-world use cases such as booking systems and automated assistants
- Created workflow automation systems using n8n, Zapier, and Make to streamline business processes
- Implemented lead management and form automation systems with conditional routing and Google Sheets integration
- Built and deployed full-stack applications using Firebase (authentication, Firestore database, hosting)
- Designed and developed a Personal Task Manager with secure user authentication and CRUD functionality
- Developed vector-based search systems using embeddings and Pinecone for AI-powered document retrieval
- Implemented document-to-vector pipelines for semantic search and knowledge-based applications
- Created AI-generated media content including videos, avatars, and marketing assets using tools like RunwayML, Midjourney, and HeyGen
- Applied prompt engineering and AI model optimization techniques to improve output accuracy and efficiency
- Deployed and tested AI chatbot solutions using Google AI Studio and custom system instructions

Frontend Developer | Brototype, Kerala

Jan 2022 – Feb 2023

- Built and optimized React-based user interfaces with high performance across devices
- Developed reusable components and frontend libraries for scalable applications
- Collaborated with backend developers and designers to deliver end-to-end solutions
- Managed source code using GitHub with branching, merging, and code reviews
- Implemented basic CI/CD workflows for continuous integration and deployment

ICT Teacher | Al Ansar International School, Sharjah

Feb 2023 – Mar 2023

- Delivered practical sessions in programming, web development, databases, and networking
- Guided students in hands-on projects and real-world IT applications
- Designed and implemented lesson plans aligned with modern technology trends
- Evaluated student performance through assignments, tests, and project-based assessments
- Provided technical support and integrated digital tools to enhance classroom learning

Computer Teacher | SAFA English School, Kerala

Jun 2016 – Mar 2019

- Delivered lessons in computer science, including Python programming, MySQL, and data visualization
- Conducted practical and theory sessions with focus on real-world applications
- Promoted coding skills, logical thinking, and technology adoption among students
- Guided students in projects, competitions, and IT-based activities

AI Certification

Applied AI Mastery Program – Edapt + IITM Pravartak | 2026

- Designed and developed AI-powered solutions including chatbots, AI agents, and workflow automation systems
- Built Retrieval-Augmented Generation (RAG) applications for intelligent data retrieval and contextual responses
- Implemented end-to-end automation workflows to streamline business processes and improve efficiency
- Applied prompt engineering techniques to optimize AI model performance and output quality
- Developed AI-driven applications integrating automation, data processing, and user interaction
- Gained hands-on experience with leading AI tools and platforms for development, automation, and content generation

Education

Master of Technology | Computer Science & Engineering

APJ Abdul Kalam Technological University | Sep 2019 - Dec 2021

Bachelor of Technology | Information Technology

Anna University | Sep 2008 - Mar 2012

Additional Details

- Visa Status: Spouse Visa
- Availability: Immediate Joiner
- Location: UAE
- Nationality: India
- Languages: English, Malayalam, Hindi, Basic Arabic

Projects

AI & Automation Projects:

- AI Booking Assistant Chatbot - Developed an AI-powered chatbot to handle meeting scheduling, collect user inputs, and create calendar events using structured prompts and workflow automation
- RAG-Based AI Chatbot System - Built a chatbot using vector database (Pinecone) and embeddings for contextual and intelligent responses
- Lead Management Automation System - Designed an automation workflow using n8n with conditional routing, Google Sheets integration, and email notifications
- Form Automation & Data Processing System - Automated form submissions with real-time data storage and conditional logic using n8n and Google Sheets
- Weather Data Automation System - Built an automated system using Make to fetch real-time weather data and update Google Sheets periodically

Web & Full-Stack Projects:

- Personal Task Manager Application - Developed a full-stack app using Firebase with authentication, CRUD operations, and user-specific data security
- AI-Enhanced Portfolio Website - Created a portfolio with AI-generated content, chatbot integration, and modern UI design
- Admin Dashboard - Built a secure dashboard with authentication, CRUD operations, and protected routes
- API-Based Applications - Developed applications like Weather App and Currency Converter with real-time API integration and error handling
